Response to Arguments

Applicant's arguments filed November 20, 2006 have been fully considered but they are not persuasive. Applicant states on page 5, paragraph 4, there exists no rationale to use the material taught by Ciambrone to modify the cap of the Liao integrated circuit socket. Applicant contends the Liao cap is already capable of being recycled, reformed and reusable. Nowhere does Liao disclose the material used to fabricate the pick up cap, therefore the contention that Liao's cap can be recycled, reformed and reused is complete conjecture.

Applicant further states on page 5, paragraph 5, the Liao reference does not recognize the problem pertaining to heat during the course of reflow with respect to the pick up cap/ cover. On the contrary, Liao specifically uses holes 302, 303 to facilitate dissipation of heat generated during the course of reflow.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
